

Implementing the Government's
metering strategy:
our policy and aspirations

The Government's energy policy goals are to:

- Put us on a path to cutting CO2 emissions by 60% by 2050 with real progress by 2020
- Maintain reliability of energy supplies
- Promote competitive markets
- Ensure all homes are adequately and affordably heated

Smart metering can

Help Government to deliver on its energy policy goals by:

- Helping cut carbon emissions
- Promoting reliable energy supplies
- Promoting and enhancing competitive markets
- Ensuring homes are properly heated

Smart metering offers

- Green Benefits
- Consumer Benefits
- Supplier Benefits
- Network Benefits
- Competition & Innovation

Smart metering complements

- Our broad domestic and business energy-saving agenda
- The Carbon Reduction Commitment
- Changes to Building Regulations
- Energy Display Certificates

Energy Services Directive

“Member States shall ensure that, in so far as it is technically possible, financially reasonable and proportionate in relation to the potential energy savings, final customers for electricity, natural gas, district heating and/or cooling and domestic hot water are provided with competitively priced individual meters that accurately reflect the final customer’s actual energy consumption and that provide information on actual time of use.”
