Detail and nature of the request	To implement an update to the ASPCoP in line with the revisions as set out in the revised mark up as attached.
Sections and Conditions to be amended	As set out in the marked up text.
Impact of the request	To update the ASPCoP in line with legal advice received.
Timetable	As soon as reasonably practicable.
Representation required at management committee	May require representation to discuss comments.
Other comments	Normally the process would then proceed to a voting Phase. However, due to the complexity & scope of the changes I believe that progressing to a Vote should be deferred to allow discussion on the responses and the potential for the CR to be amended in light of those responses.
