

What is ASPCoP?

The Automated Meter Reading (AMR) Service Providers Code of Practice is designed to set new industry standards for the collection, collation, processing and data storage of data taken from gas meter reads.

Why choose an ASPCoP accredited supplier?

ASPCoP Accredited AMR Service Providers have to adhere to a strict set of requirements which are audited on an annual basis

What are the requirements of the Code of Practice?

- AMR installations are completed in compliance with industry safety & technical standards
- Installation processes will be mapped out in accordance with the Code of Practice
- All members of the Code of Practice will have a minimum level of Public Liability Insurance
- Members will have the systems in place to ensure data accuracy, assurance & integrity
- Devices will have a high standard of technical capability & provide remote access to data
- A clear record keeping process is required by all ASPCoP accredited suppliers to provide customer transparency at all times
